

Inntopia

Pre-Season Checklist: Winter

The snow will be flying soon, so it's time to coordinate your pre-season Commerce projects. Some of these tasks require lead time for our Engineering team to complete, while others can be quickly implemented by Partner Services using the Setup Tool. Use this checklist to keep track of your tasks.

Your To-Do List

#	Check When Done	To-Do
1		Add liability waivers to any new products introduced this season and/or update waivers for existing products as necessary
2		Update, add, or remove delivery methods or locations for RTP products
3		Add new product category options
4		Add new attributes or attribute options to a product category
5		Remove or add customer requirement options to an existing customer requirement
6		Request new barcode setup
7		Submit branding requests for sales channels
8		Display/hide dynamic filter options
9		Set up the custom Itinerary Quote Email template
10		Set up new OTA PMS Integration for a supplier
11		Create and activate new Siriusware-integrated supplier accounts
12		Create and activate a new one-way, RTP-integrated supplier account
13		Add new non-integrated customer requirements
14		Activate a new RMS supplier account
15		Add or remove barcodes to an existing supplier setup
16		Enable RTP customer property sets on RTP products
17		Configure age ranges for your YieldView ticket display
18		Request to run product check reports
19		Request to run bundle check reports
20		Add bundles with scheduling components
21		Add new Property Amenities (Covid-related or otherwise)

* Upon receiving a request, Partner Services will provide specific timing.

Optional Considerations

The following options may require additional charges. Contact Partner Services or your Strategic Account Manager for more information and pricing. If you are interested in a demo, please let us know and we will schedule one with you.

#	Check When Done	To-Do
